(LISTED BELOW)

SUPPLEMENT TO
REPORT NO.

~~CONFIDENTIAL~~

1. Large quantities of a product called "Stirole" [Styrol] are being produced at the airplane Assembly Center in Vladivostok.
2. "Stirole" is manufactured from coke and refuse from chemical plants which utilize or refine compounds containing carbon. The manufacturing process, originally quite complicated and entailing considerable material and expense, was simplified by two Soviet "professors," Karavayekh (fnu) and Bakisirokh (fnu), who are now known as the inventors of the product.
3. "Stirole" is used in:
 - a. The manufacture of lenses
 - b. Insulators for high tension electrical lines
 - c. Accessories for radio and electrical appliances
 - d. The manufacture of bullet-proof glass, as a base [sandwiching material]
 - e. Special materials manufactured for installation in submarines.

REFERENCE CITED: LUDARV

25X1A [REDACTED] Note: It is probable that the product used as indicated in paragraph 3 is actually "Polystyrene", a derivative of Styrol.
